Introduction

Agricultural Statistics is published each year to meet the diverse need for a reliable reference book on agricultural production, supplies, consumption, facilities, costs, and returns. Its tables of annual data cover a wide variety of facts in forms suited to most common use.

Inquiries concerning more current or more detailed data, past and prospective revisions, or the statistical methodology used should be addressed directly to the agency credited with preparing the table. Most of the data were prepared or compiled in the U.S. Department of Agriculture.

The historical series in this volume have been generally limited to data beginning with 1991 or later.

Foreign agricultural trade statistics include Government as well as non-Government shipments of merchandise from the United States and Territories to foreign countries. They do not include U.S. shipments to the U.S. Armed Forces abroad for their own use or shipments between the States and U.S. Territories. The world summaries of production and trade of major farm products are prepared by the U.S. Department of Agriculture from reports of the U.S. Department of Commerce, official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, and the result of office research.

Statistics presented in many of the tables represent actual counts of the items covered. Most of the statistics relating to foreign trade and to Government programs, such as numbers and amounts of loans made to farmers, and amounts of loans made by the Commodity Credit Corporation, etc., are data of this type. A large number of other tables, however, contain data that are estimates made by the Department of Agriculture.

The estimates for crops, livestock, and poultry made by the U.S. Department of Agriculture are prepared mainly to give timely current State and national totals and averages. They are based on data obtained by sample surveys of farmers and of people who do business with farmers. The survey data are supplemented by information from the Censuses of Agriculture taken every five years and check data from various sources. Being estimates, they are subject to revision as more data become available from commerical or Government sources. Unless otherwise indicated, the totals for the United States shown in the various tables on area, production, numbers, price, value, supplies, and disposition are based on official Department estimates. They exclude States for which no official estimates are compiled.

DEFINITIONS

"Value of production" as applied to crops in the various tables, is derived by multiplying production by the estimated season average price received by farmers for that portion of the commodity actually sold. In the case of fruits and vegetables, quantities not harvested because of low prices or other economic factors are not included in value of production. The word "Value" is used in the inventory tables on livestock and poultry to mean value of the number of head on the inventory date. It is derived by multiplying the number of head by an estimated value per head as of the date.

The word "Year" (alone) in a column heading means calendar year unless otherwise indicated. "Ton" when used in this book without qualifications means a short ton of 2,000 pounds.

WEIGHTS, MEASURES, AND CONVERSION FACTORS

The following table on weights, measures, and conversion factors covers the most important agricultural products, or the products for which such information is most frequently asked of the U.S. Department of Agriculture. It does not cover all farm products nor all containers for any one product.

The information has been assembled from State schedules of legal weights, various sources within the U.S. Department of Agriculture, and other Government agencies. For most products, particularly fruits and vegetables, there is a considerable variation in weight per unit of volume due to differences in variety or size of commodity, condition and tightness of pack, degree to which the container is heaped, etc. Effort has been made to select the most representative and fairest average for each product. For those commodities which develop considerable shrinkage, the point of origin weight or weight at harvest has been used.

The approximate or average weights as given in this table do not necessarily have official standing as a basis for packing or as grounds for settling disputes. Not all of them are recognized as legal weight. The table was prepared chiefly for use of workers in the U.S. Department of Agriculture who have need of conversion factors in statistical computations.

WEIGHTS, MEASURES, AND CONVERSION FACTORS (See explanatory text just preceding this table)

Rice, milled (excluding brewers)	100 pounds	152 pounds rough or unhulled rice
Rye flour	do	2.23 bushels rve, beginning 1947
Sheep and lambs	1 pound live weight	0.504 pound dressed weight (1999 average)
Soybean meal	1 pound	1.27 pounds soybeans
Soybean oil	do	5.49 pounds sovbeans
Sugar	1 Ion raw	0.9346 ton refined
Tobacco	1 pound farm-sales weight	Various weights of stemmed and unstemmed, according to aging and the type of tobacco. (See circular 435, U.S. Dept. of Agr.)
Tomatoes	1 case canned 22	0.018 ton fresh
Turkeys	1 pound live weight	0.80 pound ready-to-cook weight
Wheat flour	100 pounds	2.30 bushels wheat 25
Wool, domestic apparel shorn	1 pound greasy	0.48 pounds scoured
Wool, domestic apparel pulled	do	0.73 pound scoured

¹Standard bushel used in the United States contains 2,150.42 cubic inches; the gallon, 231 cubic inches; the cranberry barrel, 5,826 cubic inches; and the standard fruit and vegetable barrel, 7,056 cubic inches. Such large-sized products as applies and potatoes sometimes are sold on the basis of a heaped bushel, which would exceed somewhat the 2,150.42 cubic inches of a bushel basket level full. This also applies to such products as sweetpotatoes, peaches, green beans. cubic inches of a bushel basket level till. This also applies to green peas, spinach, etc.

² Approximate inside dimensions, 4% by 16½ by 16% inches.

³ Approximate inside dimensions, 4½ by 13½ by 16% inches.

⁴ Approximate inside dimensions, 13 by 12 by 32 inches.

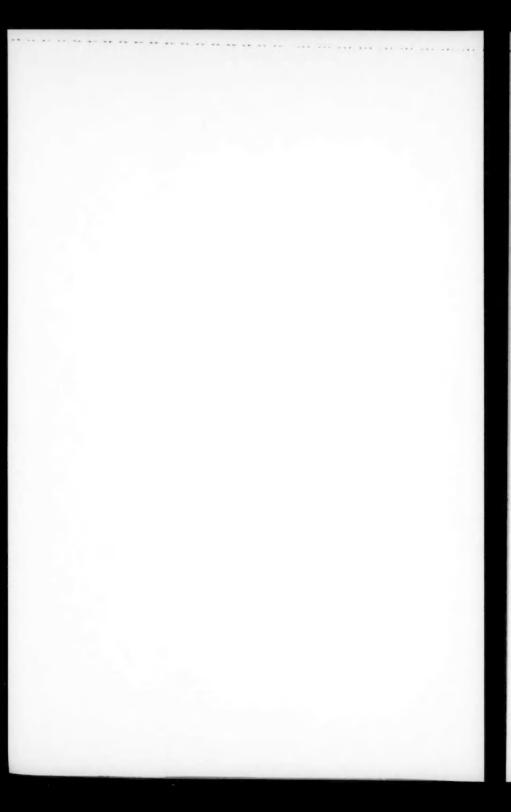

⁶ Approximate inside dimensions, 13 by 18 by 21% inches.

⁶ Approximate inside dimensions, 13 by 12 by 32 inches.
⁶ Approximate inside dimensions, 13 by 18 b

²³ Varies widely by method of harvesting.
24 The milk equivalent of ice cream per gallon is 15 pounds. Reports from plants indicate about 81 percent of the butterfat in ice cream is from milk and cream, the remainder being from butter and concentrated milk. Thus the milk equivalent of the milk and cream in a gallon of ice cream is about 12 pounds.

The miss and cream in a gallon or ice cream is about 12 pounds.

27 This is equivalent to 4.51 bushels of what per barrel (198 pounds) of flour and has been used in conversions, beginning July 1, 1957. Because of changes in milling processes, the following factors per barrel of flour have been used for earlier periods: 1790–1879, 5 bushels; 1880–1904. 4.75 bushels, 1990–17. 4.7 bushels; 1918 and 1919. 4.5 bushels; 1824. 4.6 bushels: 1921–44. 4.7 bushels; July 1844–Feb. 1946, 4.57 bushels; March 1946–Oct. 1946, average was about 4.31 bushels; and Nov. 1946–June 1957. 4.57 bushels.

CHAPTER I

STATISTICS OF GRAIN AND FEED

This chapter contains tables for wheat, rye, rice, corn, oats, barley, sorghum grain, and feedstuffs. Estimates are given of area, production, disposition, supply and disappearance, prices, value of production, stocks, foreign production and trade, price-support operations, animal units fed, and feed consumed by livestock and poultry.

Table 1-1.—Total grain: Supply and disappearance, United States, 1992-2001 1

¹Aggregate data on com, sorghum, barley, oats, wheat, rye, and rice.

²The marketing year for com and sorghum begins September 1; for oats, barley, wheat, and rye, June 1; and for rice, August 1.

³Preliminary, ⁴Projected as of January 11, 2002, World Agricultural Supply and Demand Estimates. Totals may not add due to independent rounding.

ERS, Market and Trade Economics Division, (202) 694–5296.

^{**}Payment rates for the 1995/96 and prior crop years were calculated according to the provisions of the now defunct deficiency payment/production adjustment program. Payment rates for the 1996/97 and subsequent crops are calculated according to the provisions of the Production Flexibility Contract (PFC) program, following enactment of the Federal Agriculture
improvement and Reform Act of 1996 (1996 Act) and includes supplemental PFC payment rates. Payment rates are rounded to the nearest tenth of a cent. * The national average loan rate was also known as the price support rate prior to enactment of the 1996 Act. * Beginning with the 1996/97 marketing year, target priors are no longer applicable. *Represents loans made, purchases, and purchase agreements entered into. Purchases and purchase agreements
are no longer authorized for the 1996 act abbsequent crops following enactment of the 1996 Act. * Acquisition of all
loans forteited during the marketing year including loans made in previous year. * *Includes 147 million bushets in Food
Security Reserve, except 131 million bushets in 1988/89, 71 million bushets in 1989/90 and 141 bushets in 1994/95. NA-

FSA. Food Grains Analysis Group, (202) 720-4146.

CONST.									

¹Years shown refer to years of harvest. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow, thus the crop harvested in the Northern Hemisphere in 1994 is combined with estimates for the Southern Hemisphere Harvests, which begin late in 1994 and end early in 1995.
² Harvested area as far as possible.
² Preliminary.

FAS, Production Estimates and Crop Assessment Division, (202) 720–0888. Prepared or estimated on the basis iil official statistics iil foreign governments, other foreign source materials, reports of U.S. Agricultural Counselors, Attachés and Foreign Service Officers, results of office research, and related information.

Table 1-12.—Wheat and flour: United States imports,1990-2000

Year beginning June	Wheat grain 1	Flour (wheat equivalent)	Other products (wheat equivalent) 2	Total wheat, flour, and other products
	1,000 bushels	1,000 bushels	1,000 bushels	1,000 bushels
1990 1991 1992 1993 1993 1994 1995 1996 1997 1998	25,540 30,924 56,859 91,287 70,561 47,753 71,727 73,245 79,766	901 923 3,122 6,486 8,073 6,687 6,386 6,055 7,423 7,115	9,932 8,751 9,435 11,086 13,313 13,493 14,220 15,623 15,815 14,984	36,373 40,598 69,416 108,859 91,947 67,933 92,333 94,923 103,004

¹ Starting January 1989, Census ceased reporting wheat suitable for milling and unfit for human consumption. Includes macaroni, semolina, and similar products. Beginning in 1988/89 total wheat grain is reported under the suitable for milling column.

ERS, Market and Trade Economics Division, (202) 694-5285.

The national average loan rate was also known as the price support rate prior to enactment of the Federal Agriculture Improvement and Reform Act of 1996. Includes loans made, purchases, and purchase agreements entered into. "Acquisition of all loans forfetted during the marketing year including loans made in previous years. "The Federal Agriculture Improvement and Reform Act of 1996 did not provide authority for rye loans after the 1995/96 marketing year. FSA. Feed Grains & Oilseeds Analysis Group, (202) 720–8838.

World Total									

¹ Years shown refer to years of harvest. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow: thus the crop harvested in the Northern Hemisphere in 1994 is combined with estimates for the Southern Hemisphere harvests, which begin late in 1994 and end early in 1995. ² Marvested area as far as possible. ³ Preliminary.

FAS, Production Estimates and Crop Assessment Division, (202) 720–0888. Prepared or estimated on the basis of official statistics of foreign Governments, other foreign source materials, reports of Agricultural Counselors, Attaches, and Foreign Service Officers, results of office research, and related information.

Table 1-21.—Rice, rough: Area, yield, production, and value, United States, 1992-2001

¹ Payment rates for the 1995/96 and prior crop years were calculated according to the provisions of the now defunct defi-ciency payment/production adjustment program. Payment rates for the 1996/97 and subsequent crops are calculated ac-cording to the provisions of the Production Flexibility Contract (PFC) program, following enactment of the Federal Agriculture Improvement and Reform Act of 1996 (1996 Act) and includes supplemental PFC payment rates. Payment rates are round-ed to the nearest tenth of a cent. ² The national average loan rate was also known as the proce support rate prior to en-actment of the 1996 Act. ³ Beginning with the 1996/97 marketing year, target prices are no longer applica-ble. ⁴ Includes loans make and purchase agreements entered. Excludes quantities on which loan deficiency payments were made. ⁵ Aquisition through loan forfeitures, crop-year basis. NA-not applicable.

FSA, Food Grains Analysis Group, (202) 720-2891.

¹Years shown refer to years of harvest. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1994 is combined with estimates for the Southern Hemisphere harvest, which begins late in 1994 and ends early in 1995. ² Harvested area as far as possible. ³ Preliminary.

FAS, Production Estimates and Crop Assessment Division, (202) 720–0888. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Counselors, Attaches and Foreign Service Officers, results of office research, and related information.

¹ Payment rates for the 1995/96 and prior crop years were calculated according to the provisions of the now defunct deficiency payment/production adjustment program. Payment rates for the 1996/97 and subsequent crops are calculated according to the provisions of the Production Phasibility Contract (PFC) program. Following enactment of the Federal Agriculture improvement and Perform Act of 1996 (1996 Act) and includes supplemental PFC payment rates. Payment rates are rounded to the nearest tenth of a cent. The national average loan rate was also known as the price support rates are rounded to the nearest tenth of a cent. The national average loan rate was also known as the price support rates are rounded to the 1996 Act. Beginning with the 1996/97 marketing year, target prices are no longer applicable. Prepresents loans made purchases, and purchase agreements entered into. Purchases and purchase greenments are longer authorized of the 1996 and subsequent crops following enactment of the 1996 Act. Percentage of production is on a grain basis. Acquisition of all loans forfeited during the marketing year including loans made in previous year. MA-not applicable.

FSA, Feed Grains & Oilseeds Analysis Group, (202) 720-8838.

¹ Payment rates for the 1995/96 and prior crop years were calculated according to the provisions of the now defunct deficiency payment/production adjustment program. Payment rates for the 1996/97 and subsequent crops are calculated according to the provisions of the Production Piexibility Contract (PFC) program, following enactment of the Federal Agriculture improvement Act of 1996 (1996 Act) and includes supplemental PFC payment rates. Payment rates are rounded to the nearest tenth of a cent. ² The national average loan rate was also known as the price support rate prior to enactment of the 1996 Act. ³ Beginning with the 1996/97 marketing year, target prices are no longer applicable. ⁴ Represents loans made, purchases, and purchase agreements are no longer applicable. ⁵ Post production is on a grain basis. ⁵ Acquisition of all loans forfeited during the marketing year including loans made in previous year. NA-not applicable.

FSA, Feed Grains & Oilseeds Analysis Group, (202) 720-8838.

¹Years shown refer to years of harvest. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1994 is combined with estimates for the Southern Hemisphere harvest, which begins late in 1994 and ends early in 1995.
² Parvested area as far as possible.
³ Preliminary.

FAS Production Estimates and Crop Assessment Division, (202) 720–0888. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Counselors, Attaches, and Foreign Service Officers, results of office research, and related information.

¹Years shown refer to year of harvest. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1994 is combined with estimates of the Southern Hemisphere harvests, which begin late in 1994 and end early in 1995.
²Harvested area as far as possible.
³Proliminary.

FAS, Production Estimates and Crop Assessment Division, (202) 720–0888. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Counselors, Attaches and Foreign Service Officers, results of office research, and related information.

¹ Data are in marketing year; for com, September 1-August 31; for oats and barley, June 1-May 31; and rice, August 1-July 31. Wheat, rye, syrup, and sugar are in calendar year. ² Excludes quantities used in alcoholic beverages. ³ Hoculdes white whole wheat, and semolina flour. ⁴ Does not include shipments to U.S. territories. Excludes erages. "Includes white, whole wheat, and semoina flour." Does not include shipments to U.S. territories. Excludes rice used in alcholic beverages. Includes imports and rice used in processed foods and pet foods. "Includes an allowance for the quantity used as hominy and grits. This series is not adjusted for trade. "Oats used in oatmeal, prepared breaktast foods, infant foods, and food products." "Malt for food, breakfast food uses, pearl barley, and flour. "Malt equivalent et barley food products." "Preliminary. Estimates of com syrup and sugar are unofficial estimates; industry data were

not reported after April 1998. Enter April 1998. Trade Economics Division, (202) 694-5290. All figures are estimates based on data from private industry sources, the U.S. Department of Commerce, the Internal Revenue Service, and other Government agencies.

¹Payment rates for the 1995/96 and prior crop years were calculated according to the provisions of the now defunct defi-ciency payment/production adjustment program. Payment rates for the 1996/97 and subsequent crops are calculated ac-cording to the provisions of the Production Flexibility Contract (PFC) program, following enactment of the Federal Agriculture Improvement and Reform Act of 1996 (1996 Act) and includes supplement PFC payment rates. Payment rates are rounded to the nearest tenth of a cent. ²The national average loan rate was also known as the prior to general contract of the 1996 Act. ³Beginning with the 1996/97 marketing year, target prices are no longer applica-ble. ⁴Represents loans made, purchases and purchase agreements entered into. Purchase agreements are no longer authorized for the 1996 and subsequent crops following enactment of the 1996 Act. Percentage of production is on a grain basis. ⁵Acquisition of all loans forfeited during the marketing year including loans made in previous year. NA-not applicable. ⁵ESA Exect Grains A. Olissents Analysis Group (2001 270–8838).

¹Payment rates for the 1995/96 and prior crop years were calculated according to the provisions of the now defunct deficiency payment/production adjustment program. Payment rates for the 1996/97 and subsequent crops are calculated according to the provisions of the Production Flexibility Contract (PFC) program, following enactment of the Federical Agriculture Improvement and Reform Act of 1996 Act) and includes supplemental PFC payment rates. Payment rates are rounded to the nearest tenth of a cent. ²The national average loan rate was also known as the price support rate prior to enactment of the 1996 Act. ³ Beginning with the 1996/97 marketing year, larget prices are no longer applicable. ⁴ Represents loans made, purchases, and purchase agreements entered into. Purchases and purchase agreements are no longer authorized for the 1996 and subsequent crops following enactment of the 1996 Act. Percentage of production is on a grain basis. ⁵Acquisition of all loans forferted during the marketing year including loans made in previous year. NA-not applicable.

FSA, Feed Grains & Oilseeds Analysis Group, (202) 720-8838.

CHAPTER II

STATISTICS OF COTTON, TOBACCO, SUGAR CROPS, AND HONEY

In addition to tables on cotton, tobacco, sugar, and honey, this chapter includes tables on fibers other than cotton and syrups. Cottonseed data, however, are in the following chapter on oilseeds, fats, and oils.

Table 2-1.—Cotton: Area, yield, production, and value, United States, 1992-2001

Payment rates for the 1995/96 and prior crop years were calculated according to the provisions of the now defunct deficiency payment/production adjustment program. Payment rates for the 1996/97 and subsequent crops are calculated according to the provisions of the Production Flexibility Contract (PFC) program, following enactiment of the Federal Agriculture
Improvement and Reform Act of 1996 (1996 Act) and includes supplemental PFC payment rates. Payment rates are rounded to the nearest thousandth of a cent. 2 The national average loan rate was also known as less rice by price support rate prior to
enactment of the 1996 Act. 3 Beginning with the 1996/97 marketing year, target prices are no longer applicable. 4 Does
not include quantify on which loan deficiency payments were made. 5 Acquisitions from the crop harvested in the year indicated. 6 Running bales. 7 Less than 500 bales. NA-not applicable.

FSA, Fiber Analysis Group, (202) 720-7954.

In Hawaii, harvest continues throughout the year and production statistics are on a calendar year basis. In other states, harvest is seasonal and the production statistics year relates to the year in which the season begins. 2 Perlieminary, 3 Prices do not include Government payments under the Sugar Act. 4 Price per ton of care for sugar used in evaluating value of production for seed. 5 Raw value is the equivalent in terms of 96 sugar, as defined in the Sugar Act of 1948. 6 Calculated on the basis that 100 pounds of raw sugar is required to produce 93.46 pounds of refined sugar.

7 Excludes edible. NA-not available.

¹ Imports for consumption, Imports in bonded warehouses (general imports) are tallied when customs as sugar whose content of sucrose, by weight in the dry state, corresponds to a polarimeter reading less than 99.5 degrees.
² Data are actual weight x 1.035.
³ October-March.
⁴ Numbers may not add due to rounding.

FAS, Horticultural and Tropical Products Division, (202) 720–4620. Compiled from reports of the U.S. Department of Commerce.

¹ Preliminary. 2 Production data in metric tons, on farm-sales-weight basis, which is about 10 percent above dry-weight data normally reported in trade statistics. 3 FSU-12 includes the 12 newly independent States of the former USSR.
FAS,Cotton, Tobacco, and Seeds Division (202) 720-9496. Prepared or estimated on the basis of official statistics of Foreign governments, other foreign source materials, reports of U.S. Agricultural Counselors, Attaches, Foreign Service Officers and results of office research, and related information.

¹ Stocks shown have been converted to a farm-sales-weight basis—the equivalent of weight at the time of sale by grower—thereby making these data of leaf-tobacco stocks comparable with data of leaf-tobacco production.
² Stocks on the island of Puerto Rico are included.
³ One Sucker and Green River combined.

AMS Market Information and Program Analysis Branch, (202) 205-0489.

CHAPTER III

STATISTICS OF OILSEEDS, FATS, AND OILS

This chapter includes information on cottonseed, flaxseed, olive oil, peanuts, soybeans, margarine, and fats and oils. Most butter statistics are included in the chapter on dairy and poultry statistics. Lard data are mostly in the chapter on livestock.

Table 3-1.—Cottonseed: All cotton harvested area and cottonseed production, farm disposition, marketing year average price per ton received by farmers, and value, United States, 1992–2001

Note: The data for this table is no longer collected. This table will not appear after this year.

1 U.S. averages not fully representative of entire crop because of relatively small volume of seed graded in some areas.

2 These basic factors are combined to form indexes of quantity and quality which in turn are used to determine the official grade of contonseed in accordance with the United States Official Standards for Grades.

2 The quantity index measures the oil and cake or meal in the cottonseed, taking into account variations in the quantity of oil, and ammonia.

4 The quantity index measures the deterioration in oil and meal and takes into account the excesses of moisture and foreign matter and free fatty acids.

5 The average grade is the product of the quantity index times the quality index. The base grade is 100.0.

6 Samples graded by licensed chemists under the supervision of the U.S. Department of Agriculture.

AMS, Cotton Program, (901) 384-3016.

CHAPTER IV

STATISTICS OF VEGETABLES AND MELONS

This chapter contains statistics on potatoes, sweet potatoes, and commercial vegetables and melons. For potatoes and sweet potatoes, the estimates of area, production, value, and farm disposition pertain to the total crop and include quantities produced both for sale and for use on farms where grown. Potato statistics are shown on a within-year seasonal grouping of winter, spring, summer, and fall

crops, by States. Some States have production in more than one seasonal group.

For processing vegetables, the estimates of area, production, and value for each of 10 crops relate to production used by commercial canners, freezers, and other processors, except dehydrators. These estimates include raw products grown by processors themselves and those grown under contract or purchased on the open market. This production and the actual area harvested are not duplicated in the fresh market estimates for the same commodities. The production of those vegetables used for processing for which regular processing estimates are not made is included in the fresh market estimates. The processed segment of production for asparagus, broccoli, carrots, and cauliflower, combined with fresh market production during the year, is published at the end of the season, separately. In 1982, processing estimates for asparagus, beets, cabbage for kraut, cucumbers for pickles, lima beans, and spinach were discontinued. Asparagus and cucumbers for pickles were reinstated in 1984. Artichokes, lima beans, snap beans, Brussels sprouts, cabbage, cantaloups, cucumbers, eggplant, escarole/endive, garlic, leaf lettuce, romaine lettuce, bell peppers, spinach, and watermelon estimates of fresh market use on an annual basis were reinstated in 1992. Estimates of processing usage were also reinstated with the 1992 crop year for lima beans, beets, cabbage for sauerkraut, and spinach. In 2000, estimates for fresh market were added for collard greens, Kale, mustard greens, turnip greens, okra, chili peppers, pumpkins, radishes, and squash.

Seasonal Groups and Marketing Period

Prospective Area For Harvest

Winter: January, February, March Summer: July, August, September

Spring: April, May, June Fall: October, November, December

Annual Acreage, Yield, Production, and Value

The seasonal patterns of harvest do not correspond precisely in all States to the estimating period or periods designated. In some cases, only one seasonal group is shown for a State, but marketing may be active in earlier or later months. Because of the small volume from this earlier or later period, the crop estimate has been placed in the seasonal group where the largest notion is harvested.

riod, the crop estimate has been placed in the seasonal group where the largest portion is harvested. Commercial vegetables for fresh market include 34 principal vegetable and melon crops in the major producing States. These estimates relate to crops which are grown primarily for sale, and they do not include vegetables and melons produced in farm and nonfarm gardens. The bulk of the production of the principal vegetable and melon crops is for consumption in the fresh state. However, quantities used by processors of celery and onions are included, and separate estimates of commercial processing are not made for these crops. The commercial estimates of the principal crops include local market production from areas near consuming centers as well as production from well recognized commercial areas which specialize in producing supplies for shipment to distant markets.

For fresh market vegetables and melons, value per unit and total value are on a f.o.b. basis. For

processed vegetables, value per unit and total value are at processing plant door.

Aggregate data for the years 1990 and 1991 and 1999 and 2000 lack comparability with data from other years because of program changes altering the crops included.

"Value of the following crops for which regular seasonal estimates are prepared in major producing States: Artichokas, asparagus, snap beans, lima beans, broccoli, brussels sprouts, cabbage, carrialoups, carrois, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole/endive, garlic, honeydew melons, head lettuce, leaf lettuce, orions, green peppers, spinach, fornatioes, and watermelons. "Preliminary." Includes Lima beans, anap beans, beets, cabbage (sauerkraut), carrots, sweet corn, cucumbers (pickles), green peas, spinach, and tomatoes. Other vegetables processed (dual purpose) included in fresh market series of estimates. "Estimates discontinued in 1999." Not published to avoid disclosure.
Data included in Other States. "Processing, 1999 - AL, FL, ID, IN, LA, ME, MA, NC, OK, and SC. Note: Beginning in 2000 collard greens, kale, mustard greens, turnip greens, okra, chili
peppers, pumpkins, radishes, and squash were added to the vegetable program.

¹ Fresh vegetable consumption computed for total commercial production for fresh market. Does not include production for home use. Consumption obtained by dividing the total apparent consumption by total July 1 population as reported by the Bureau of the Census. All data for calendar year. ¹¹Includes artichokes, eggplant, radishes, brussets sprouts, squash, green limas, and eccarcie/endive. Beginning in 2000, also includes collards, mustard greens, turnip greens, kale, okra, and pumpkins ³Preliminary.

ERS, Market and Trade Economics Division, Specialty Crope Branch, (202)694-5253.

CHAPTER V

STATISTICS OF FRUITS, TREE NUTS, AND HORTICULTURAL SPECIALTIES

For most fruits, production is estimated at two levels—total and utilized. Total production is the quantity of fruit harvested plus quantities which would have been acceptable for fresh market or processing but were not harvested or utilized because of economic and other reasons. Utilized production is the amount sold plus the quantities used on farms where grown and quantities held in storage. The difference between total and utilized production is the quantity of marketable fruit not harvested and fruit harvested but not sold or utilized because of economic and other reasons. Production relates to the crop produced on all farms, except for apples and strawberries. In accordance with Congressional enactment, the Department's estimates of apple production since 1938 have related only to commercial production. The estimates for strawberries cover production on area grown primarily for sale. Statistics on utilization of fruit by commercial processors refer to first utilization, not necessarily final utilization. For example, frozen fruit includes fruit which may later be used for preserves.

The price shown for each crop is a marketing year average price for all methods of sales. Prices for most fresh fruit are the average prices producers received at the point of first sale, commonly referred to as the "average price as sold." Since the point of first sale is not the same for all producers, prices for the various methods of sale are weighted by the proportionate quantity sold. For example, if in a given State part of the fruit crop is sold f.o.b. packed by growers, part sold as bulk fruit at the packinghouse door, and some sold retail at roadside stands, the fresh fruit average price

as sold is a weighted average of the average price for each method of sale.

The annual estimates are checked and adjusted at the end of each marketing season on the basis of shipment and processing records from transportation agencies, processors, cooperative marketing associations, and other industry organizations. The estimates are reviewed (and revised if necessary) at 5-year intervals, when the Census of Agriculture data become available. The Department's available statistics are limited to the major tree fruits and nuts and to grapes, cranberries, and strawberries, and exclude some States where census data indicate production is of only minor importance.

Year	Domestic exports							
October October	Fresh	Canned 1	Dried 1	Dried, in fruit salad 2	Total, in terms of fresh 3			
	Metric tons	Metric tons	Metric tons	Metric tons	Metric tons			
1990	4,894 4,795 5,167 7,650 4,031 3,492 6,604 6,980 9,201 6,153	1,519 1,763 1,269 760 1,450 1,338 1,086 968 980 1,695	1,207 1,362 1,214 1,188 1,105 1,376 1,034 927 1,538 1,577	421 414 428 488 569 519 396 428 339	14,351 15,18t 14,517 16,810 13,670 14,191 14,63t 19,556			

¹ Net processed weight. ² Dried apricots are 12½ percent of total dried fruit for salad. ³ Dried fruit converted to unprocessed dry weight by dividing by 1.07. Unprocessed dry weight converted to terms of fresh fruit on the basis that 1 pound dried equals 5.5 pounds fresh. Canned apricots converted to terms of fresh on the basis that 1 pound canned equals 0.717 pounds fresh.

¹ Spit years refer to harvest periods which usually begin in the fall and extend through the following spring. This corresponds roughly with October-June in the Northern Hemisphere and April-December of the second year shown in the Southern Hemisphere. 2 Preliminary. 3 Includes temple oranges. 4 Includes tangelos. NA-not available.

FAS, Horticultural and Tropical Products Division, (202) 720–3423. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Counselors, Attaches, and Foreign Service Officers, results of office research, and related information. U.S. data are from USDA Agricultural Statistics Board.

¹Net processed weight. ²Dried pears are 16% percent of total dried fruit for salad. ³Canned pears are 35 percent of total canned fruit for salad. ⁴Dried converted to unprocessed dry weight by dividing by 1.03. Unprocessed dry weight converted to terms of fresh on the basis that 1 pound dried equals about 6.5 pounds fresh. Canned converted to terms of fresh on basis that 1 pound fresh on the basis that 1 pound fresh.

ERS, Specialty Crops Branch, (202) 694-5260.

¹ Net processed weight. ² Exports and imports of dried prunes converted to unprocessed dry weight by dividing by 1.04. Unprocessed dry weight converted to terms of fresh fruit on the basis that 1 pound dried equals 2.7 pounds fresh. ⁹ Otherwise prepared or preserved converted to terms of fresh fruit on the basis that 1 pound equals 0.899 pound fresh. ⁹ Dried prunes in saled estimated at 43 percent of total dried fruit for saled.

ERS, Specialty Crops Branch, (202) 694-5260.

[&]quot;Specialty mushroom estimates represent growers who have at least 200 natural wood logs in production or commercial indoor growing areas. "Growers counted only once for US total if growing more than one specialty type mushroom. Growers growing Agaricus and Specialty are included. "Total production includes all fresh market and processing sales plus amount harvested but not sold (shrinkage, cullage, dumped, etc.). "Virtually all specialty mushroom sales are for tresh market." Prices for mushrooms are the average prices producers receive at the point of first sale, commonly referred to as the average price as sold. For example, if in a given State, part of the fresh mushrooms are sold F.O.B. packed by growers, part are sold bulk to brokers or repackers, and some are sold retail at roadside stands, the mushroom average price as sold is a weighted average of the average price for each method of sale. ¹ Data not comparable because in 1991 28 States were surveyed and in 1992-2000 36 were surveyed. ² Equivalent wholesale value of all sales except for ported foliage which is value of sales less cost of plant material purchased from other growers for growing on. ³ Estimates began in 1994. ⁴ Beginning in 1996. Other Lilies are no longer published separately. ⁵ 1994-2000 data not comparable with 1991-93 which includes data for cyclamen and kalanchoes. Potted orchids were included in other flowering prior to 1996. ⁴ Pretod orchids reported separately for first time in 1996. Previously orchids were included in other flowering category. ⁷ This data series discontinued.

NASS, Crops Branch, (202) 720-2127.

¹ Data not comparable because in 1991 28 States were surveyed and in 1992–2000 36 were surveyed. ² Equivalent wholesale value of all sales. ³ Estimates began in 1994. ⁴ 1994–2000 data not comparable with 1991–93 which includes data for impatiens, New Guinea impatiens, and petunias. ⁶ Does not include vegetable transplants grown for use in commercial vegetable production.

¹Wholesale value of sales as reported by growers with \$100,000 or more in sales of floriculture crops plus a calculated wholesale value of sales for growers with sales below \$100,000. The value of sales for growers below the \$100,000 level was estimated by multiplying the number of growers in each size group by the mid-point of each dollar value range.

CHAPTER VII

STATISTICS OF CATTLE, HOGS, AND SHEEP

This chapter contains information about most kinds of farm livestock and livestock products, with the exception of dairy and poultry. The information relates to inventories, production, disposition, prices, and income for farm animals, and to livestock slaughter (including horse slaughter), meat production, and market statistics for meat animals.

Table 7-1.—All cattle and calves: Number and value, United States, Jan. 1, 1993-2002

<sup>Tincludes custom slaughter for use on farms where produced and State outshipments, but excludes interfarm sales within
the State. ** Excludes custom slaughter for farmers at commercial establishments. ** Adjustments made for changes in inventory and for inshipments. ** Includes receipts from marketings and sales of farm-slaughter. ** Includes cash receipts from sales of cattle, calves, beef, and veal plus value of cattle and calves slaughtered for home consumption.

NASS, Livestock Branch, (202) 720–3570.</sup>

¹Total rail and truck receipts. Saleable receipts 1978 on. ²Rounded total of complete figures. ³The number of stockyards reporting varies from 41 to 68. ²Covers receipts at 14 packing plants and 30 concentration yards. Prior to 1994 includes numbers from the following areas: Kansas City, National Stockyards Fort Worth.

AMS, Livestock & Grain Market News, (202) 720-7316. Compiled from reports received from stockyard companies.

Table 7-34.—Hogs and corn: Hog-corn price ratio and average price received by farmers for corn, United States, 1991–2000

Year	Hog-com price ratio 1	Price of corn per bushel ²
		Dollars
1991	20.9	2.33
1992	18.5	2.29
1993	20.5	2.29
1994	16.4	2.41
1995	16.4	2.56

1998	14.7	2.20
1999	17.3	1.89
2000	23.3	1.86

¹ Number of bushels of com equal in value to buy 100 pounds of live hogs at local markets, based on average prices received by farmers for hogs and com. Annual average is a simple average of monthly ratios for the calendar year. "Annual average is a simple average of entire month prices for the calendar year."

NASS, Environmental, Economics, and Demographics Branch, (202) 720-6146.

¹ Scoured wool, plus greasy wool converted to a scoured basis, using assumed average yields, includes both pulled and shorn, foreign and domestic wool. Wool was considered as consumed (1) on the woolen system when laid in mixes and (2) on the worsted system as the sum of top and noil production. ² Domestic, duty-paid, and duty-free foreign. ³ Excludes wool consumed on the cotton system and in the manufacture of feit, hat bodies, and other miscellaneous products.

ERS, Field Crops Branch, (202) 694-5300. Compiled from reports of the U.S. Department of Commerce.

¹Wool not advanced in any manner or by any process of manufacture beyond washed, scoured, or carbonized condition. ²The country of origin for the 2.2 million pounds of miscellaneous imported raw wool was: New Zealand, 1.6 million; and Australia, 0.6 million.

ERS, Field Crops Branch, (202) 694-5300. Compiled from reports of the U.S. Department of Commerce.

Table 7-61.—Wool: Average price per pound, clean basis, delivered to United States mills, 1992-2001 1

	Terri	Australian 64's good		
Year	64's (20.60-22.04 microns)	Avg. 58's-56's (24.95-27.84 microns)	topmaking (in bond, American yield)	
1992 1993 1994 1995 1996 1997 1997 1998 1999	Cents 204 137 212 249 193 238 162 110 108	Cents 141 102 126 170 137 153 113 70 67	Cents 222 194 311 216 300 200 177	

¹Beginning January 1976 the unit designation terminology for wool prices changed to microns. For example 64's (20.60–22.04 microns) formerly was fine good French combing and staple. Two designations 56's (26.40–27.84 microns) and 56's (24.95–26.95 microns) have been averaged in the price data shown here and together were formerly the category fleece ³⁴ blood good French combing and staple. ³⁴Wool grown in the range areas of California, Oregon, Washington, Texas, the intermountain States (including Arizona and New Mexico), and parts of the Dakotas, Kansas, Nebraska, and Oklahoma. These wools vary considerably in shrinkage and cotor.

ERS, Field Crops Branch, (202) 694-5300 and AMS.

¹ Carcass weight equivalent or dressed weight. Beginning 1977, pork production was no longer reported as "pork, excluding land." This series has been revised to reflect pork production in prior years on a dressed weight basis that is comparable with the method used to report beef, veal, and lamb and mutton. Edible offals are excluded. Shipments to the U.S. territories are included in domestic consumption. ² Preliminary. ³ Forecast. NA-not available.

ERS, Animal Products, (202) 694-5180.

CHAPTER VIII

DAIRY AND POULTRY STATISTICS

Dairy statistics in this chapter include series relating to many phases of production, movement, prices, stocks, and consumption of milk and its products. Two series of number of milk cows on farms are included in this publication. One series is an inventory number of a specific classification estimated as one of the major groups making up the total cattle population on January 1. The other series identified as "milk cows" is an annual average number of milk cows during the year (excluding any not yet fresh) and is used in estimating milk production.

In comparing the several series of milk prices, it is important to note that prices received by farmers for all whole milk sold are for milk or milkfat content as actually sold, while certain prices paid by dealers for milk for fluid purposes or for specified manufacturing purposes may be quoted on a 3.5 percent butterfat basis, or for some types of manufacturing milk on the test of the milk used

for that particular purpose.

Poultry and poultry products statistics include inventory numbers of chickens by classes; the production, disposition, cash receipts, and gross income from chickens and eggs; poultry and egg receipts at principal markets; commercial broiler production; turkey production, disposition, and gross income; poultry and eggs under Federal inspection; and the National Poultry Improvement Plan. Estimates relating to inventories, production, and income exclude poultry and eggs produced on places not classified as farms.

¹Commercially prepared 16%dairy ration: Annual average prior to 1995, April price 1995-current. ² Annual ratios based on average of monthly ratios. Pounds of 16 % mixed dairy feed equal in value to one pound of whole milk. Effective January 1995, prices of commercial prepared feeds are based on current U.S. prices received for com (51 lbs), soybeans (8 lbs), and affaifa hay (41 lbs).

2000	23,225	3,521,686	151.6	21,092	3.68	781	93	3.15	664

¹The decline in protein production in 2000 reflects a measurement change by the dairy industry from crude to true protein beginning in May 2000. The percentage of milk that is true protein is lower than the percentage that is crude protein by an approximate difference of 0.19 percent.

ARS, Animal Improvement Programs Laboratory, (301) 504-8334, rlaipl@aipl.arsusda.gov or http://aipl.arsusda.gov.

¹ Excludes milk sucked by calves. ² Milk sold to plants and dealers as whole milk and equivalent amounts of milk for cream. Includes milk produced by dealers own herds and small amounts sold directly to consumers. Also includes milk produced by institutional herds. ³ Percentage of milk sold that is eligible for fluid use (grade A for fluid use in most States). Includes fluid-grade milk used in manufacturing dairy products. ⁴ May not add due to rounding.

1999	16.24	14.09	67	65	4,148	216,794	14,960,544	
2000	14.24	12.11	66 67 72	70	4,590	207.496	14,439,962	

¹Over this period, handlers elected periodically not to pool substantial volumes of milk that normally would have been pooled under Federal orders. This decision resulted from disadvantageous blend/class price relationships and qualification circumstances. This fact should be kept in mind if year-to-year comparisons are made using the various "producer deliveries" measures of growth. ²End of year. ²Data for 1991-99 are estimated. Data for 2000 according to U.S. Census of Population. ⁴Average for year. ³ Prices are weighted averages.

AMS, Dairy Programs, (202) 720–7461.

Ice cream, regular 3	878,572	913.770	935.080	972.210	969.742
Ice cream, lowfat 4	366,126	385,689	406.679	381,236	382.084
Ice cream, nonfat	41.426	40.640	42.802	39.859	32.905
Sherbet (does not include water ices)	52,611	53.077	54.592	54.479	52.944

Preliminary.
 Cottage cheese curd includes pot and bakers' cheese. Creamed cottage cheese contains not less than 4 percent milkfat. Lowfat cottage cheese contains less than 4 percent milkfat.
 Contains minimum milkfat content of 10 percent and not less than 4.5 pounds per gallon.
 Includes freezer-made milkfat acquired for ice cream.

¹Milk production plus the milk equivalent (ME) of net imports of dairy manufacturing ingredients and net out-of-storage movement of cream equals total supply. Data on milk used in manufacturing products are based on total milkdat required to product the products and include the milk equivalent of any imported dairy ingredients used. ²Preliminary. ³Whole milk equivalent (milkdat basis) of net imports of dairy manufacturing ingredients such as frozen cream and butterfal-sugar mixtures. ³Whole milk equivalent of net out-of-storage movement of fluid and plastic cream during the year. A negative figure represents a net movement of cream into storage. ⁵Includes cottage cheese to remove the control of the control

¹ Prices are for milk of 3.5 percent butterfat content and for the principal pricing point of the market. ² For those orders that use the component pricing system for paying producers (orders 1, 30, 32, 33, 124, 126, and 135), the figures are the statistical uniform price (the sum of the produce price differential and the class Ill price). For those orders that use the skim milk/butterfat pricing system for paying producers (orders 5, 6, 7, and 131), the figures are the uniform price (the sum of the uniform butterfat price times 2.5 and the uniform skim milk price times 0.965). ² Sutfolk Co. (Boston), MA. ⁴Mecklerburg Co. (Chariotte), NC. ⁵Futton Co. (Atlanta), GA. ⁶Hiltsborough Co. (Tampa), FI. ⁷Cuyahoga Co. (Clevicald), OH. ⁶Due to disadvantageous intraorder class and uniform price relationable in some morths in these markets, handlers elected not to pool milk that normally would have been pooled under these orders. ⁸Cook Co. (Chicago), IL. ¹⁰Jackson Co. (Kansac City), MO. ¹¹Dallas Co. (Dallas), TX. ¹²Maricopa Co. (Phoenix), Az. ¹³Satt Lake City), UT. ¹⁴King Co. (Seattle), WA.

¹Total disappearance is based on production, imports, and change in stocks during the year. Production statistics for these commodities appear in other tables in this chapter. The total apparent consumption was obtained by subtracting ending stocks, shipments, and exports, from the total supply. The per capita consumption for each year was obtained by dividing the total apparent consumption by the number of persons. ³Includes all kinds of cheese except cottage and full-skim American. ³The evaporated milk is unakimmed, unswesterned, case goods. The condensed milk is unswesterned, unswitched bulk goods, and swesterned condensed milk, unskimmed, case and bulk goods.

ERS, Animal Products Branch, (202) 694-5180.

000	10.6	6.6	8			

¹ Number of pounds of poultry feed equivalent in value at local market prices to 1 dozen market eggs, or 1 pound of broiler or 1 pound of turkey live weight. Simple average of monthly feed-price ratios. Egg feed= com (75 lbs) and soybeans (25 lbs); turkey feed= com (51 lbs), soybeans (28 lbs), and wheat (21 lbs). Monthly equivalent prices of commercial prepared feeds are based on current U.S. prices received for com, soybeans, and wheat

NASS, Environmental, Economics, and Demographics Branch, (202) 720-3570.

CHAPTER IX

FARM RESOURCES, INCOME, AND EXPENSES

The statistics in this chapter deal with farms, farm resources, farm income, and expenses. Many of the series are estimates developed in connection with economic research activities of the Depart-

For convenience the tables have been arranged in general groups. These groups, with the beginning table indicated, are as follows:

Economic trends, table 9-1.

Farm property, table 9-2. Population and employment, table 9-15.

Farm production and distribution, table 9-23.

Price and income, table 9-29.

Costs and expenses, table 9-41.

Table 9-1.—Economic trends: Data relating to agriculture, United States, 1991-2000

¹ Columns 3.4, and 5 refer only to land rented from others and operated, so subleased land is not included. Numbers of land rented are comparable in the same year, but definitions change over time. Basic sources are 1969 Census of Agriculture, table 5, pp.14 1974 Census of Agriculture, table 5, pp. 124-127; 1982 Census of Agriculture, vol. 1, part 51, table 48, p. 49; 1987 Census of Agriculture vol. 1 part 51, table 48, p. 49; 1987 Census of Agriculture vol. 1 part 51, table 48, p. 49; 1987 Census of Agriculture vol. 1, part 51, table 48, p. 57; and earlier census of Agriculture, 1, part 51, table 48, p. 57; and earlier census volumes as noted. *Sum of part owners and owner/lenant, 1900 Census of Agriculture, table 20, pp. 308. *Assumes land leased by part-owners is the difference between the average leased by part-owners and part-owner farms. Acreage leased by part-owners is this difference times the number of part-owners. 1910 Census of Agriculture, vol. VI, part 11, table 5, p. 97-99. *1920 Census of Agriculture, vol. VI, part 11, table 5, p. 98-59.

ERS, Resource Economics Division, (202) 694–5529. Data from the Census of Agriculture, National Agricultural Statistics Service and Economic Research Service.

¹Cropland harvested, crop failure, and cultivated summer fallow. ²Grassland and other nonforest pasture and range. ³Excludes reserved and other forest land duplicated in parks and other special uses of land, includes forested grazing land. ⁴Includes rural transportation areas, Federal and State areas used primarily recreation and wildlife purposes, military areas, farmsteads, and farm roads and lanes. ⁵Miscellaneous areas such as marshes, open swamps, bare rock areas, and deserts, including urban and other special uses not inventoried. ⁶Approximate land area as established by the Bureau of the Census in conjunction with the 1990 Census of Population.

ERS, Resource Economics Division, (202) 694–5528. Estimates based on reports and records of the U.S. Departments of Agriculture and Commerce, and public land administering and conservation agencies. Estimates developed for years coinriding with a Census of Agriculture.

Forest land ³	608	601	728	723	703	648	648	642
Special uses 4		NORTH THE PARTY NAMED IN	147	174	203	335	340	351
Other land	179	194	305	291	301	227	224	235
Total land area 5	1,904	1,904	2,271	2,264	2,265	2,265	2,263	2,263

¹Cropland harvested, crop failure, and cultivated summer fallow. ²Grassland and other nonforest pasture and range. ³Excludes reserved and other forest land duplicated in parks and other special uses of land, includes forested grazing land. ³Includes urban and transportation areas. Federal and State areas used primarily for recreation and wildlife purposes, military areas, farmsteads and farm roads and lanes. ⁵Remeasurement and increases in reserviors account for changes in total land areas except for the major increase in 1959 when data for Alaska and Hawaii were added.

¹Farms are defined as places with sales greater than \$1,000 annually.
²Horses and mules are excluded.
³Excludes all crops held on farms including crops under loan to Commodity Credit Corporation, and crops held off farms as security for CCC loans.
⁴Includes farm share of currency and demand deposits.
⁵Total of rounded data.
⁶Loans of all operating banks, the Farm Credit System, and direct loans of the Farm Service Agency.
⁷Loans and credits extended by dealers, merchants, finance companies, individuals, and others.
⁸Preliminary.

¹ Beginning in July 1984, three surveys a year were conducted in the 48 contiguous States and Hawaii. In 1989, January was added to the survey program. Data are obtained from establishments for the week that includes the 12th.

² Includes farm operators and partners doing 1 or more hours of farm work and other unpaid workers working 15 hours or more during the survey week without cash wages.

³ Includes all persons doing farm work for pay during the survey week.

⁴ Excludes agricultural service workers.

⁵ Annual average not computed.

⁶ Discontinued.

NASS, Economic, Environmental and Demographics Branch, (202) 720-6146.

¹ Includes wool, mohair, horses, mules, honey, beeswax, bees, goats, rabbits, aquaculture, and fur animals. These items are not included in the separate groups of livestock and products shown. "Cattle and calves, sheep and lambs, and hogs. "Butter, butlerfat, wholesale milk, retail milk, and milk consumed on farms. "Feed grains and forage crops. "All wheat, rye, and rice. "Soybeans, peanuts havessted for nuts, sunflower seed, and flaxseed. "Potatoes, sweetpotatoes, dry edible beans, dry field peas, truck crops for processing, and fruck crops for fresh market having value. "Fruits, berries, and free nuts having value. Cfruits, berries, and free nuts having value. Cfruits based on year of bloom. "Includes sugar crops, floriculture and ornamentals, forest products, tegums and grass seeds, hops, mint, broomcom, popcom, hemp fiber and seed, and flax fiber."

ERS, Environmental Indicators and Resource Accounting Branch (202) 694-5601.

Table 9-21.—Hired farmworkers: Number of Workers and Median Weekly Earnings, 1999-20011

Part-time (less than 35 hours	000	100					
per week)	172	169	144	105	120	13	

¹Represents average number of persons 15 years old and over in the civilian noninstitutional population who were employed per week as hired farmworkers. Based on the Current Population Survey microdata earnings file.

² "Median weekby earnings" is the value that divides the earnings into two equal parts, one part having earnings above the median. "Earnings" refers to the weekly earnings the farmworker usually earns at a farmwork job, before deductions, and includes any overtime pay or commissions.

³ Preliminary.

⁴ Excludes persons of Hispanic origin. Hispanic origin.

ERS, Food Assistance, and Rural Economy Branch, (202) 694-5438.

¹For cattle, sheep, and hogs, the quantity of net production is the live weight actually produced during the year, adjustments having been made for animals shipped in and changes in inventory. Estimates for broilers and eggs cover the 12-month period Dec. 1, previous year through Nov. 30. ²Preliminary, except for wool shorn and mohair. ³Young chickens of meat-type strains raised for meat production. ⁴AZ, NM, and TX. ⁵Value of fish sold. ⁶Value of fish and eggs sold.

NASS, Livestock Branch, (202) 720-3570.

Table 9-26.—Agricultural productivity: Index numbers (1992=100) of farm output per unit of input. United States, 1987–96

	Year	Productivity 1
987 988 989 990 991		87 83 90 93
992 993 994 995 996		90 100 90 100 100

¹ Productivity is the output-input ratio. The ratio is obtained by dividing the index of farm output in table 9-25 by the index of total input in table 9-26.

ERS, Environmental Indicators and Resource Accounting Branch (202) 694-5601.

Table 9-27.-U.S. farm foods: Marketing bill, farm value, and consumer expenditures, 1991-20001

Year	Total marketing bill	Farm value	Expenditures for farm foods
	Billion dollars	Billion dollars	Billion dollars
1991	363.5	101.6	465.1
1992	369.4	105.1	474.
1993	379.6	109.6	489
1994	402.6	109.6	512.
1995	415.7	113.8	529.
1996	424.5	122.2	546.
1997	444.6	121.9	566.
1998	465.4	119.6	585
1999	503.1	122.2	625.
20002	537.8	123.3	661.

¹The total marketing bill is the difference between total expenditures for domestic farm-originated food products and the farm value or payment farmers received for the equivalent farm products. It relates only to food purchased by consumers that is not imported or exported. ²Pelietimiany.

ERS, Food Markets Branch, (202) 694-5375.

Table 9-28.—Farm food products: Marketing costs, United States, 1991-2000

Year	Labor 1	Packaging materials	Intercity transpor- tation, rail and truck	Fuels and electricity	Corporate profits before taxes	Other ²	Total marketing bill 3
	Billion dollars	Billion dollars	Billion dollars	Billion dollars	Billion dollars	Billion dollars	Billion

¹The market basket consists of foods that mainly originate on U.S. farms bought in foodstores in a base period, currently 1982–84. ²Indexes of retail cost are components of the Consumer Price Index published by the Bureau of Labor Statistics. ³Gross return or payment to farmers for the farm products equivalent to foods in the market basket. ⁴The spread between the retail cost and farm value is an estimate of the gross margin received by marketing firms for assembling, processing, transporting, and distributing the products. ⁵Preliminary.

ERS, Food Markets Branch (202) 694-5375.

¹These indexes are computed using the price estimates of averages for all classes and grades for individual commodities being sold in local farm markets. In computing the group indexes, prices of individual commodities have been compared with 1990-92 weighted average prices. The resulting ratios are seasonally weighted by average quantities sold for the nest recent previous 5-year pendo. For example, 1994 indexes use quantities sold for the period 1988-92. Then, the 1990-92 indexes are adjusted to a 1910-14 reference. Fresh market for noncitrus, and fresh market and processing for citrus. ³Ratio of Index ef Prices Received to the Index ef Prices Prices Received to the Index ef Prices Received to the Index effect to t

¹These indexes are computed using the price estimates of averages for all classes and grades for individual commodities being sold in local farm markets. In computing the group indexes, prices of individual commodities have been compared with 1990–92 weighted average prices. The resulting ratios are seasonally weighted by average quantities sold for the most recent previous 5-year period. For example, 1994 indexes use quantities sold for the period 1988–92. ² Fresh market for noncitrus, and tresh market and processing for citrus. ³ Ratio of Index of Prices Received (1990–92=100) to Index of Prices Plad by Farmers for Commodities & Services, Interest, Taxes, and Wage Rates (1990–92=100). ⁴Preliminary.

NASS, Environmental, Economics, and Demographics Branch, (202) 720-6146.

Prices paid by famers are collected, for the most part, from retail establishments located in smaller cities and fowns in rural areas. Prior to 1995, recorded prices reflected a modified annual average based on frequency item was surveyed during the year. Recorded item values, 1993-99, are the U.S. April average price. "Excludes Federal, State, and local per gallon taxes where applicable." Excludes Federal excise tax. "Includes Federal, State, and local per gallon taxes. "Excludes cost of application, except for limestone. "Discontinued in 2000." With hydraulic lift, transport wheels, and tires. "Formulation abbreviations: EC-Emulsfallable Concentrate, DF-Dry Flowable, DG-Dry Granular, G-Granular, L-Liquid, S-Solution, SP-Soluble Powder, and WP-Wettable Powder.

NASS, Environmental, Economics, and Demographics Branch, (202) 720-6146.

¹National averages during the marketing years for the individual crops, beginning in the years shown. ²The target price is known in the statute as the "established price". ³1½ strict low middling, micronaire 3.5 through 4.9. ⁴For quota portion of crop. ⁵No support program. ⁶Grade No. 2 or better except for oats which is Grade No. 3. ⁷Includes flaxseed, sunflower seed (oil and other), safflower, rapesseed (industrial), canola and mustard seed. ⁹The Federal Agriculture improvement and Reform Act at 1996 replaced the deficiency payment/production adjustment programs for the program crops with a Production Flexibility Contract program, making target prices no longer applicable beginning with the 1996/97 marketing year. ⁹The rye price support program was terminated by the Federal Agriculture Improvement and Reform Act at 1996. ¹²The wool and mohair support programs terminated by the Federal Agriculture Improvement and Reform Act of 1996. ¹²The wool and mohair support programs terminated as of December 31, 1995, as required by Public Law 103-130. ¹³As of January 1, 1997. ¹⁴As of January 1, 1998. ¹⁵As of January 1, 1998. ¹⁵As of January 1, 1998. ¹⁵As of January 1, 1998.

FSA, Economic Policy and Analysis Staff. (202) 720-3451.

¹USDA estimates and publishes individual cash receipt values only for major commodities and major producing States. The U.S. receipts for individual commodities, computed as the sum of the reported States, may understate the value of sales for some commodities, with the balance included in the appropriate category labeled "other" or "miscellaneous." The degree of underestimation in some of the minor commodities can be substantial.

*The relative standard exceeds 25 percent, but is no more than 50 percent.

*Farm operator household income

11.8

11.9

4.2

*The relative standard exceeds 25 percent, but is no more than 50 percent.

*Farm operator household income is defined to be consistent with definitions used in the Current Population Survey (CPS). The CPS, conducted by the Census Burnau, is the source of official U.S. household income statistics. The CPS definition include any income received as cash, in-kind receipts are excluded. The CPS definition departs from a strictly cash concept by including depreciation in the list of operating expenses that farm operators and other self-employed people subtract from gross receipts when they report net money income .

**Placetalling from a change in the survey design, net cash income from gross receipts when they report net money income income.

**Placetalling them as change in the survey design, net cash income from operating another farm or ranch and net farm income from term farmal are not available for all versions of Agricultural Resource Management Study in 2000.

*Further, net cash income from operating another farm or ranch and net farm income from farmal are not separate from total off-farm income.

*Therefore, and earnings of the operator household from off-farm sources are not strictly comparable to those from previous years.

*A component of farm sector income.

*Except and contact the farmal sector income.

**Except and c

¹The average rates are estimates (rates over \$10.00 are rounded to the nearest dime) based on survey indications of monthly lease rates for private, non-irrigated grazing land from the January Agricultural Survey. ² Includes animal unit plus cow-calf rates. Cow-calf rate converted to animal unit (AUM) using (1 aums-cow-calf '0.83). ³ Seventeen Western States: All States listed. ⁴ Sixteen Western States: All States listed. ⁴ Sixteen Western States: All States, except Texas. ⁵ Eleven Western States: AZ, CA, CO, ID, MT, NV, NM, OR, UT, WA, WY. ❖ Nine Great Plains States: CO, KS, NE, NM, ND, OK, SD, TX, WY. NASS, Environmental, Economics, and Demographics Branch, (202) 720–6146.

CHAPTER X

INSURANCE, CREDIT, AND COOPERATIVES

The statistics in this chapter deal with taxes, insurance, agricultural credit, and farm cooperatives. Some of the series were developed in connection with research activities of the Department, while others, such as data from agricultural credit agencies, are primarily records of operations.

Table 10-1.—Crop losses: Average percentage of indemnities attributed to specific hazards, by crops, 1948–99

Includes operator households. Includes loans of national and commercial, mutual savings, stock savings, and private banks. Loans are classified according to location of bank and, therefore, are not strictly comparable with data for other lenders which are classified according to location of borrower.

 Preliminary. **Jincludes District of Columbia.**

ERS, Farm Sector and Performance and Well-Being Branch, (202) 694~5586.

³Reports of cooperatives are included for the calendar year. ³Includes independent local cooperatives, centralized cooperatives, lederations of cooperatives and cooperatives with mixed organizational structures. Cooperatives are classified according to their major activity, if, for example, more than 50 percent of a cooperative's business is derived from anxieting activities, it is included as a marketing cooperative. ³Includes cooperative whose major activity is providing services related to marketing and tarm supply activities. ⁴Includes members (those entitled to vote for directors) but does not include nonvotring patrons. (Some duplication exists because some farmers belong to more than one cooperative.) ⁵Receipts for services related to marketing and purchasing activities, but not included in the volumes reported for these activities. ⁶Revised. ⁷Preliminary. ⁸Estimated grab subsiness includes all business reported between cooperatives, such as the wholesable business of tarm supply cooperatives with other cooperatives or terminal market sales for local cooperatives. ⁸Estimated net business reported business for farmers. Figures are adjusted for duplication resulting from intercooperative business.

¹ Represents value at the first level at which cooperatives transact business for farmers. ² Includes coffee, fish, forest products, hay, hops, seed marketed for growers, nursery stock, other farm products not separately classified, and sales of farm products not received directly from member-patrons. Also includes manufactured food products and resale flams marketed by cooperatives. ³ Includes automotive supplies, building materials, chicks, containers, farm machinery and equipment, hardware, meats and other supplies not separately classified. ⁴ Charges for services related to marketing or purchasing but not included in the volume reported for those activities, plus other income.

RBS, Statistics, (202) 720-2480 or celestine.adams@usda.gov. Based on records from cooperatives reporting to the Service.

¹Represents value at the first level at which cooperatives transact business for farmers. These statistics for 2000 are presented on a national basis only. Totals may not add due to rounding. ² Dollar volume or membership is not shown to avoid disclosing operations of individual cooperatives. ³ Sales outside the United States, sales to domestic military installations, and sales of certain products not received directly from member-patrons.

<sup>Tourilative from organization, May 11, 1935.

Actual funds advanced out of RUS loans approved, as shown in table 10-18.

Includes data at time of repayment of loan for borrowers whose loans have been repaid in full. As of Jan. 1, 2000, there were 288 such borrowers with 604,366 miles energized and 4,033,840 consumers served.

Excludes energy sales and revenues of power sold by one RUS borrower to another. Includes patronage capital.

Includes rural nonfarm and farm consumers.</sup>

RD, Planning and Policy Branch, (703) 805-4392.

CHAPTER XI

STABILIZATION AND PRICE-SUPPORT PROGRAMS

The statistics in this chapter relate to activities of the Commodity Credit Corporation (CCC), cropland diversion and production adjustment programs, and marketing agreement and order programs for fruits and vegetables. Statistics for Federal Milk Marketing Order programs are contained in chapter VIII.

Table 11-1.—Commodity Credit Corporation: Price-supported commodities owned as of Dec. 31, 1991–2000¹ (Inventory quantity)

Year	Barley	Butter and butter oil	Cheese	Com	Cotton upland	Sorghum grain	Nonfat dry milk	Oils and oilseeds
	Million bushels	Million pounds	Million pounds	Million bushels	1,000 bales	Million bushels	Million pounds

¹Loans made directly by Commodity Credit Corporation. As far as possible, loans have been distributed according to the location of producers receiving the loans. Direct loans to cooperative associations for the benefit of members have been distributed according to the location of the association. ² Includes flasseed and other oilseeds.

FSA, Financial Management Division, (703) 305-1277.

Table 11-10.—Fruit, vegetable, and tree nut marketing agreement and order programs, 2000-2001

Program	Estimated num- ber of commer- cial producers	Farm value	
Citrus fruits (2000-01 season):	Number	1,000 dollars	
Florida oranges, grapefruit, tangerines, and tangelos	11,000	242.248	
Florida limes	52	4.180	
Texas oranges and grapefruit	234	20.933	
Deciduous fruits (2000 season):	201	20,000

Tart cherries (7 States) 2	900	52.541	
Washington and Oregon Bartlett pears	1.600	31.055	
Washington and Oregon fresh prunes 3	100	2.716	
Cranberries (10 States) 4	1,100	106,827	
Hawaiian papayas	400	15,879	
Dried fruits (2000 season):		1000	
California dates	100	17,835	
California dried prunes	1,250	168,840	
California raisins	4.500	285.874	
Vegetables (2000-01 season):			
Florida tomatoes	100	491,25	
Idaho and Eastern Oregon onions	280	94,790	
South Texas meions	33	56,543	
South Texas onions	78	71,982	
Georgia onions (Vidalia)	144	50,804	
Walla Walla onions	65	4,980	
Potatoes (2000-01 season):			
Colorado	261	105,658	
Idaho and Eastern Oregon	950	185,75	
Oregon and Northern California	238	23,98	
Southeastern States (Virginia-North Carolina)	85	6,94	
Washington	380	57,30	
Nuts (2000 season):		****	
California almonds	6,000	681,64	
California walnuts	5,000	289,19	
Oregon and Washington hazelnuts	800	21,37	
Peanuts 5	23,000	844,80	
Spearmint oil (2000 season) 6	179	16,22	
(Total 36 programs) 7		4.596.22	

"Value of non-Bartlett pears is not available. "The tart cherry order covers the States of Michigan, New York, Pennsylvania, Oregon, Utah, Washington, and Wisconsin. "Farm value is available only for fresh and processed combined. "Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesotta, Oregon, Washington, and Long Island in New York, (Only top 5 are reported). "There is only a marketing agreement (No. 148) for peanuts, it covers the States of Alabama, Florida, Georgia, Mississippi, South Carolina, Artzona, Arkansas, California, Lousiana, New Mexico, Okiahoma, Texas, Missouri, North Carolina, Tennessee, and Virginia. The marketing agreement covers about 95 percent of all peanuts; figures here are for all U.S. peanuts. Non-signers to the Agreement must meet the same quality and inspection requirements that apply under the Agreement 146. "The marketing order regulates the handling of speammit oil produced in the States of Washington, Idaho, Montana, Nevada, Utah, Oregon, and California. The farm value is the sum of values for Idaho, Cregon, and Washington, the only significant producing States in the marketing order area. "Total number of producers cannot be determined from totals for individual commodities; some producers produce more than one commodity.

AMS, Fruit and Vegetable Programs. (202) 720-2615.

CHAPTER XII

AGRICULTURAL CONSERVATION AND FORESTRY STATISTICS

Statistics in this chapter concern conservation of various natural resources, particularly soil, water, timber, wetlands, wildlife, and improvement of water quality. Forestry statistics include area of private and public-owned forest land, timber production, imports and exports, pulpwood consumption and paper and board production, area burned over by forest fires, livestock grazing, and recreational use of national forest lands.

¹The National Cooperative Soil Survey of the Natural Resources Conservation Service and cooperating agencies is designed to locate, describe, and show on maps the different kinds of soil and make multiple-use interpretations of each kind of soil for town-and-country planning and for other purposes.
² Pacific Basin (PB) is a new addition, it includes the American Trust Territories of American Samoa, Islands of Aunuu, Otu, Closega, Tau, and Tuthilla, Federated States of Micronesia Islands of Kosrae, Ponape, Truk and Yap; Territory of Guarn; Islands of Airik, Arno, Majuro, Mili, and Taroa, Republic of the Marshall Islands; Islands of Aguian, Rota, Saipan and Tinian, Commonwealth of the Northern Mariana Islands; and Islands of Palau, Republic of Palau.

³ Puerto Rico (PR) includes acreages for Virgin Islands. This was previously designated as Caribbean.

NRCS, Soil Survey Division, (202) 720-1820.

¹ Data may not add to totals because of rounding. ² Forest land is land at least 10 percent stocked by forest trees of any size, including land that formerly had such tree cover and that will be naturally or artificially regenerated. Forest tand includes transition zones, such as areas between heavily forested and nonforested lands that are at least 10 percent stocked with forest trees, and forest areas adjacent to urban and built-up lands. Also included are pinyon-juniper and chaparral areas in the West and afforested areas. The minimum area for classification of forest tands in 1 acre. Poadside, stressmide, and shetherbelt strips of timber must have a crown width at least 120 feet wide to qualify as forest land. Unimproved roads and trails, streams, and clearings in forest areas are classified as forest if less than 120 feet in width. ² Timberland is producing or is capable of producing crops of industrial wood and that is not withdrawn from timber utilization by statute or administrative regulation. Areas qualifying as timberland space part of industrial wood in natural stands. Currently inaccessible and inoperable areas are included. ⁴Includes Indian lands. ⁵Includes Hawaii.

FS, Timber Demand and Technology Assessment, RWU-4851, (608) 231-9376.

¹ Data may not add to totals because of rounding. ²The net increase in the volume of trees during a specified year.

Components include the increment in net volume of trees at the beginning of the specific year surviving to its end, plus the net volume of trees reaching the minimum size class during the year, minus the volume of trees that died during the year, and minus the net volume of trees that became cull trees during the year. ³The net volume of trees removed from the inventory during a specified year by harvesting, cultural operations such as timber stand improvement, or land clearing. ⁴The volume of sound wood in trees that died from natural causes during a specified year. ³Includes Hawaii.

1 National Forest System acreage.—A nationally significant system of Federally owned units of forest, range, and related land consisting of national forests, purchase units, national grasslands, land utilization project areas, experimental forest areas, experimental range areas, designated experimental areas, other land areas; water areas, and interests in lands that are administrated by USDA Forest Service or designated for administration through the Forest Service.

National forests.—Units formally established and permanently set aside and reserved for national forest purposes.

Purchase units.—Units designated by the Secretary of Agriculture or previously approved by the National Forest Reservation Commission for purposes of Weeks Law Acquisition.

National grasslands.—Units designated by the Secretary of Agriculture and permanently held by the Department of Agriculture under Title III of the Bankhead-Jones Farm Tenant Act.

Land utilization projects.—Units designated by the Secretary of Agriculture for conservation and utilization under Title III of the Bankhead-Jones Farm Tenant Act.

Research and experimental areas.—Units reserved and dedicated by the Secretary of Agriculture for forest or range research and experimental areas.—Units administered by the Forest Service that are not included in the above groups. 2 Other acreage.—

Lands within the unit boundaries in private, State, county, and municipal ownership and Federal lands over which the Forest Service has no jurisdiction. Areas of such lands which have been offered to the United States and have been approved for States. 3 Less than 500 acres.

Western Washington and western Oregon. ² Southern region. ³ Pacific Southwest region. Includes Jeffrey pine. ⁴ Pacific Northwest region. ⁵ Eastern and Southern regions. ⁶ Eastern region.

Forest Service National Forest prices in this table are for timber sold on a Scribner Decimal C log rule basis, except in the Northeastern States where International Variorh log rule is used. Prices include KV payments; exclude timber sold by land exchanges and from land utilization project lands. Data for 1983 are statistical high bid prices; beginning in 1984, data are high bid prices which include specified road costs.

FS, Timber Demand and Technology Assessment, RWU-4851. (608) 231-9376.

CHAPTER XIII

CONSUMPTION AND FAMILY LIVING

The statistics in this chapter deal with the consumption of food by both rural and urban people, retail price levels, and other aspects of family living of farm people. Data presented here on quantities of food available for consumption are based on material presented in the earlier commodity chapters, but they are shown here at the retail level, a form that is more useful for an analysis of the demand situation faced by the producer. Data on quantities of farm-produced food consumed directly by farm households are presented in the commodity chapters. Its value and the rental value of the farm home are given in the section on farm income.

¹Computed by Center for Nutrition Policy and Promotion (CNPP), USDA, Based on Economic Research Service estimates of per capita quantities of food available for consumption (retail weight) and on CNPP estimates of quantities of produce from home gardens and certain other foods. No deduction is made in food supply estimates for loss of food or nutrients in further processing, in marketing, or in the home. Data include iron, thiamin, risoldiavin, niacin, vitamin B., vitamin B., accordic acid, and zinc added by enrichment and fortification. ²Sodium levels do not reflect sodium from most processed foods and therefore underestimate total sodium available in the U.S. food supply.

Center for Nutrition Policy and Promotion (CNPP), (703) 305-2563

¹Basis is that all meals and snacks are purchased at stores and prepared at home. For specific foods and quantities of foods in the Low-Cost, Moderate-Cost, and Liberal Plans, see Family Economics Review, No. 2 (1983): for specific foods and quantities of foods in the Thrifth Food Plan, see Family Food Plan, 1989, Executive Sumary, CNPP-7A. The Thrifty Food Plan is based on 1989-91 data, and the other three food plans are based on 1977-78 data updated to current dollars using the Consumer Price Index for specific food items. 2*The costs given are for individuals in -depreson tamilies. For individuals in other size families, the following adjustments are suggested: 1-person-add 20 percent; 2-person-add 10 percent; 3-person-add 5 percent; 5- or 6-person-subtract 5 percent. 3*Ten percent added for family size adjustment.

Center for Nutrition Policy and Promotion, (703) 605-4266.

ERS, Food Markets Branch, (202) 694-5384.

CHAPTER XIV

STATISTICS OF FERTILIZERS AND PESTICIDES

This chapter contains statistics on percentages of crop acres treated by various types of fertilizers and pesticides. Nitrogen, phosphate, and potash are the most common fertilizers; herbicides, insecticides, fungicides, and other chemicals are the main categories of pesticides. Other chemicals include soil funnigants, vine killers, and dessicants. The tables show data for field crops for 1997–2000, fruits for 1999, and vegetables for 2000. NASS collects data for field crops on an annual basis and data for fruits and vegetables on a bi-yearly alternating basis. The surveyed States are generally the major producing States for each crop shown in the tables and represent 65–95 percent of the U.S. planted acres, depending on the selected crop. Quantities and rates of active chemical ingredients applied to each crop at State levels are available in the NASS series of "Agricultural Chemical Usage" reports.

Table 14-1.—Field crops: Fertilizer, total acreage, and percent of area receiving applications, all States surveyed, 1997–2000 1

CHAPTER XV

MISCELLANEOUS AGRICULTURAL STATISTICS

This chapter contains miscellaneous data which do not fit into the preceding chapters. Included here are summary tables on foreign trade in agricultural products; statistics on fishery products; tables on refrigerated warehouses; and statistics on crops in Alaska.

Foreign Agricultural Trade Statistics

Agricultural products, sometimes referred to as food and fiber products, cover a broad range of goods from unprocessed bulk commodities like soybeans, feed corn and wheat to highly-processed, high-value foods and beverages like sausages, bakery goods, ice cream, or beer sold in retail stores and restaurants. All of the products found in Chapters 1-24 (except for fishery products in Chapter 3) of the U.S. Harmonized Tariff Schedule are considered agricultural products. These products generally fall into the following categories: grains, animal feeds, and grain products (like bread and pasta); oilseeds and oilseed products (like canola oil); livestock, poultry and dairy products including live animals, meats, eggs, and feathers; horticultural products including all fresh and processed fruits, vegetables, tree nuts, as well as nursery products and beer and wine; unmanufactured tobacco; and tropical products like sugar, cocoa, and coffee. Certain other products are considered "agricultural," the most significant of which are essential oils (Chapter 33), raw rubber (Chapter 40), raw animal hides and skins (Chapter 41), and wool and cotton (Chapters 51-52). Manufactured products derived from plants or animals, but which are not considered "agricultural" are cotton yarn, textiles and clothing; leather and leather articles of apparel; and cigarettes and spirits.

U.S. foreign agricultural trade statistics are based on documents filed by exporters and importers and compiled by the Bureau of the Census. Puerto Rico is a Customs district within the U.S. Customs territory, and its trade with foreign countries is included in U.S. export and import statistics. U.S. export and import statistics include merchandise trade between the U.S. Virgin Islands and foreign countries even though the Virgin Islands of the United States are not officially a part of the

U.S. Customs territory.

Data on trade of other U.S. outlying possessions with foreign countries is not compiled by the United States. Export statistics are fully compiled on shipments to all countries, except Canada, where the value of commodities classified under each individual Schedule B number is over \$2,500. Value data for such commodities valued under \$2,501 are estimated for individual countries using factors based on the ratios of low-valued shipments to individual country totals for past periods. The estimates for low-valued shipments are shown under a single Schedule B number and are omitted from the statistics for the detailed commodity classifications. Shipments valued under \$2,501 to all counties, except Canada, represent slightly less that 2.5 percent of the monthly value of U.S. exports to those countries. As a result of the data exchange between the United States and Canada, the United States has adopted the Canadian import exemption level for its export statistics on shipments to Canada. The Canadian import exemption level is based on total value per shipment rather than value per commodity classification line item.

The export value, the value at the port of exportation, is based on the selling price and includes inland freight, insurance, and other charges to the port. The country of destination is the country of ultimate destination or where the commodities are consumed or further processed. When the shipper does not know the ultimate destination, the shipments are credited to the last country, as known

at the time of shipment from the United States.

Agricultural products, like manufactured goods, are often transhipped from the one country to another. Shippers are asked to identify the ultimate destination of a shipment. However, transhipment points are often recorded as the ultimate destination even though the actual point of consumption may be in a neighboring state. Thus, exports to countries which act as transhipment points are generally overstated, while exports to neighboring countries are often understated. Major world transhipment points include the Netherlands, Hong Kong, and Singapore. In such cases, exports are over reported for the Netherlands, but under reported for Germany, Belgium and the United Kingdom. They are overstated to Hong Kong, but under reported to China, and they overstated to Singapore, but understated to Malaysia and Indonesia. After the collapse of communism in Eastern Europe and Russia, Germany and the Baltic countries became important transhipment points to those countries further east.

Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption. The import value, defined generally as the market value in the foreign country, excludes import duties, ocean freight, and marine insurance. The country of origin is defined as the country where the commodities were grown or processed. Where the country of

origin is not known, the imports are credited to the country of shipment.

Import statistics are fully compiled on shipments valued over \$1,250. Value data for shipments valued under \$1,251 are not required to be reported on formal entries. They are estimated for individual countries using factors based on the ratios of low-valued shipments to individual country totals for past periods. The estimates for low-valued shipments are shown under a single HTS number. The total value excluded represents slightly less than 1 percent of the monthly import value.

¹Fiscal years Oct. 1–Sept. 30. ²Includes food exported for relief or charity by individuals and private agercies. ³Competitive agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such U.S. commodities. Noncompetitive agricultural imports include all others, about 90 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and vegetable fibers.

Fiscal years, Oct. 1–Sept. 30. ² Preliminary. ³ Competitive agricultural import products consist of all products similar to agricultural commodities produced commercially in the United States, together with all other agricultural products interchangeable to any significant extent with such U.S. commodities. Noncompetitive agricultural products include all others, about 90 percent of which consist of rubber, coffee, raw silk, cacao beaus, wool for carpets, bananas, tea, spices, and vegetable fibers.

ERS, Market and Trade Economics Division, (202) 694-5272. Compiled from reports of the U.S. Department of Commerce.

¹ Fiscal years Oct. 1–Sept. 30. ² Competitive agricultural import products consist of all products similar to agricultural commodities produced commercially in the United States, together with all agricultural products interchangeable to any significant extent with such U.S. commodities. Noncompetitive agricultural products include all others, about 90 percent of which consist of rubber, coffee, raw slik, cacao beans, wool for carpets, bananas, tea, spices, and vegetable fibers. ³ Beginning January 1, 1984 includes Canary Islands. ⁴ Totals may not add due to rounding.

ERS, Market and Trade Economics Division, (202) 694-5272. Compiled from reports of the U.S. Department of Commerce.
